

## ***'Partners for Africa' Policy Dialogue Senegal***

***Dakar, Senegal, 20 – 21 April 2005***

***Venue: Hotel AL AFIFA***

### ***Programme***

This policy dialogue workshop is organised by ENDA, Senegal, in collaboration with ITDG, United Kingdom, in the framework of the ***project PARTNERS FOR AFRICA funded by the European Commission, DG Research.***

Coordinators/contact points:

Dr. Salimata Wade, ENDA (salywade@ucad.sn, energy2@enda.sn)

Mr. Teodoro Sanchez, ITDG (Teodoro.Sanchez@itdg.org.uk)

Dr. Rainer Janssen, WIP – Renewable Energies (rainer.janssen@wip-munich.de)

#### **Objectives of the Workshop**

This workshop will bring together to policy makers, researchers, programme executors and the Civil Society, to discuss and analyse the different issues related to sustainable household energy and health, like indoor air pollution, poor lighting, sustainability and income generation; the existing policies and programmes promoting better health and the development of Millennium Goals. As well as to gather the most important policy needs and ways of implementing.

## **Background**

Nearly three billion people worldwide cook and/or heat their homes with simple stoves burning traditional polluting fuels resulting in smoke. Nearly 2 billion have no access to electricity and consequently no opportunities to access to improved services like education, health, communications and others. The use of polluting solid fuels contributes to chronic obstructive pulmonary disease in women, and is implicated in other adverse health outcomes including low birth-weight, active TB and cataracts.

## **Participants**

This workshop is meant to be organised with the participation of about 30 participants coming from the health, energy, development and research sectors, from African countries and other parts of the world.

## **Topics to be discussed**

- 1) Case studies of programmes, policy or actions executed or in execution related to household energy and health, and energy and income generation activities.
- 2) Government strategies on household energy and development of millennium goals
- 3) Research activities related to health and household energy, policy needs and ways of implementation
- 4) Discussion about the needed policy priorities and actions to be taken within partners (for future work).

## The PARTNERS FOR AFRICA consortium

In this action, the consortium has a high level of expertise and high quality contacts in Sub-Saharan Africa and Europe at its disposal. The consortium comprises 6 actors, active in the renewable energy and international development fields. 3 of these are of European, and 3 of African origin. The 3 European members of the consortium are:

- WIP-ETA Consortium (WEC), Germany/Italy. (*Co-ordinator*)
- ITDG, UK
- SEI, Sweden

These players lend particular strength to this project through their experience in the coordination of the global energy and development networks:

- LAMNET ([www.bioenergy-lamnet.org](http://www.bioenergy-lamnet.org))
- CARENSA ([www.carensa.net](http://www.carensa.net))
- Sparknet ([www.sparknet.info](http://www.sparknet.info))

These networks deal with local, national and international energy and development issues. These interdisciplinary networks support international dialogue and action fora, bringing together key actors and stakeholders from the energy, biomass and development sectors.

The African consortium members are highly experienced and have an established reputation in the fields of renewable energy and development from a wide range of past projects and collaborations. They are:

- Illovo Sugar, South Africa
- ENDA, Senegal
- CEEEZ, Zambia
